CAREER OBJECTIVE :

Recent AI & Data Science graduate and Junior Developer with a strong foundation in Java, Python, Machine Learning, and SQL. Familiar with web technologies such as HTML, CSS, JavaScript, and Flask through academic projects. Eager to apply programming and AI skills, learn new technologies, and contribute to software development teams in an entry-level role.

EDUCATION :

B.Tech– Artificial Intelligence And Data Science Engineering *CGPA: 8.27* 2022–2026
Hindusthan Institute of Technology, Coimbatore.

SKILLS

Java

- Strong foundation in Core Java with a solid understanding of OOP concepts such as inheritance, encapsulation, abstraction, and polymorphism.
- Experienced in building full-stack applications using Java Spring Boot, REST APIs, and role-based authentication with Spring Security and JWT.
- Proficient in writing structured Java programs using control statements, loops, arrays, exception handling, and working with constructors and access modifiers.

Python&Machine Learning

- Strong foundation in Python with hands-on experience in Scikit-learn, covering supervised/unsupervised ML, model training, and evaluation.
- Experienced in data cleaning, pre-processing, feature engineering, and OCR (Tesseract) to build real-world AI-powered applications.
- Skilled in applying ML classifiers and predictive models to automate tasks and extract meaningful insights from datasets.

Web Technologies & Tools

- Proficient in HTML, CSS, JavaScript, Flask (backend), and React (basic) for developing full-stack web applications with clean UI.
- Familiar with Git/GitHub, Linux, VS Code, and MySQL for version control, development, and database management.
- Familiar with Wireshark, Nmap, and Kali Linux for network vulnerability assessment and basic penetration testing.

PROJECTS

- **District Intelligent Automation Command Center:**
AI-driven governance automation platform integrating real-time analytics, predictive models, and full-stack technologies to reduce manual intervention in district-level administrative workflows.
- **AI-Powered Personal Finance Assistant:**
Built an AI assistant that automates expense tracking by scanning physical bills using OCR and categorizing transactions with ML classifiers, featuring a smart dashboard with personalized savings recommendations.

INTERNSHIP

Machine Learning Intern – Career Solutions (2026)

- Applied machine learning concepts to solve practical problems through project-based learning using real-world datasets.
- Performed data cleaning, preprocessing, and feature analysis to improve model performance and prediction accuracy.

Cyber Security Intern – Corizo (2024)

- Performed vulnerability assessments on networks and web applications using Nmap and Wireshark, identifying and documenting security weaknesses.
- Conducted penetration testing simulations on WordPress environments using Kali Linux tools to evaluate attack surfaces.

CERTIFICATIONS

- Corizo Virtual Internship Certificate (Completed) - Cyber Security.
- Coursera Specialization Course (Completed) – Google Data Analytics Specialization.
- Infosys Springboard Foundation Certificate (Completed) – Machine Learning Foundation
AI Foundation

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief. I understand that any misrepresentation or false information may lead to the cancellation of my candidature.
